PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building full-stack web applications and distributed platforms using FastAPI, Flask, Spring Boot, React, Angular, and PostgreSQL. Skilled in REST API design, Docker containerization, CI/CD pipelines, automated testing, and cloud deployment on AWS/Azure. Passionate about clean architecture, test-driven development, and delivering robust, maintainable software.

PROFESSIONAL EXPERIENCE

Data & AI Engineer

February – August 2026

DXC Technology Morocco – Internship

Sale El Jadida, Morocco

- Designed and built AI Sandbox, a full-stack platform for ML benchmarking and AI agent evaluation, from architecture to production deployment on an Azure VM.
- Developed a FastAPI backend with PostgreSQL, Redis, MinIO, MLflow, and multi-team RBAC authentication, containerized with Docker Compose and deployed behind an Nginx reverse proxy.
- Wrote automated test suites (Pytest, Vitest) covering backend and frontend; delivered features in Scrum sprints with code reviews.
- Technologies: Python, FastAPI, PostgreSQL, Redis, Docker, Nginx, Pytest, Vitest, Azure.

Software Engineer & Data Scientist

July – September 2025

JESA S.A. – Internship

Casablanca, Morocco

- Built CentralGIS, a geospatial web application with a centralized, containerized architecture (Flask, PostgreSQL/PostGIS, MapLibre GL JS) deployed via Docker.
- Developed REST APIs and ingestion pipelines using Kafka and web scraping to extract and centralize geospatial data from PDFs and reports.
- Optimized SQL queries and PostgreSQL/PostGIS indexes, reducing data access time by 40% and ensuring consistent cross-environment deployment with Docker.
- Technologies: Python, Flask, PostgreSQL, PostGIS, Kafka, Docker, REST APIs.

Full Stack Developer

April – June 2024

OCP Group – Internship

Safi, Morocco

- Developed a digitalized HR management application (Spring Boot, Angular, PostgreSQL) with RFID time tracking, leave requests, absence justification, and automated report generation for managers and employees.
- Built real-time dashboards and optimized SQL queries, improving backend performance by 30%.
- Collaborated in an Agile team with CI/CD deployment and code reviews on Linux/Docker.
- Technologies: Spring Boot, Angular, PostgreSQL, Docker, CI/CD, SQL.

EDUCATION

National Higher School of Arts and Crafts (ENSAM)

2024 – 2026

Master's Degree in Big Data & Internet of Things – With Honors

Casablanca, Morocco

Faculty of Sciences and Techniques (FST)

2020 – 2024

Bachelor's Degree in Information Systems & Digital Transformation – With Highest Honors

Settat, Morocco

PROJECTS

Healthics – Full-Stack Medical Platform

2024

- Developed a full-stack web application with a React.js frontend and a Spring Boot REST API for medical data management and symptom-based pathology prediction.
- Designed a distributed backend architecture (Hadoop, Spark, HBase) for scalable processing of medical data, and implemented an interactive dashboard with a medical chatbot.

SKILLS

- Programming:** Python, Java, TypeScript, JavaScript, SQL, C, Bash
- Backend Development:** FastAPI, Flask, Spring Boot, SQLAlchemy, Pydantic, REST APIs
- Frontend Development:** React, Angular, MapLibre GL JS
- Databases:** PostgreSQL, PostGIS, MongoDB, Redis, MySQL, SQL Server
- DevOps & Cloud:** Docker, Docker Compose, Nginx, Git, GitHub Actions, CI/CD, Linux, AWS, Azure
- Testing:** Pytest, Vitest
- Architecture:** Microservices, MVC, Design Patterns

CERTIFICATIONS

AWS Cloud Foundations (2026) • Scrum Foundation Learner (2025)

LANGUAGES

• **French:** Fluent • **English:** Fluent • **Arabic:** Native
